

WHMIS (Workplace Hazardous Materials Information System)

Course Outline

Training duration: 4 hours

Description:

This training will provide participants with the general knowledge and understanding of the safe and efficient ways of working with, in proximity to and the safe handling of WHMIS hazardous and controlled products in the workplace.

The training will meet your company obligations under the Occupational Health & Safety Act and Regulations and other applicable Governing Agencies specific to WHMIS.

Training covers the following topics;

- Introduction to WHMIS
- The WHMIS system
- Supplier, Employer, Supervisor & Worker responsibilities
- Safe use, handling and storage of WHMIS controlled products
- Supplier, Workplace and Other Identifier labeling systems and requirements
- WHMIS symbols
- Hazard classifications
- Routes of entry
- MSDS (Material Safety Data Sheets)

Objectives:

Participants to understand;

- The safe use, handling and storage of WHMIS controlled products in the workplace
- How to protect themselves and others from exposure, accidents and health problems
- What to do in the case of an emergency in the event of a airborne release or spill
- Where to find more information other then the label
- Their responsibility when working with or handling WHMIS controlled products.

Maximum class size: 20
